FIGURE 8

A circular arrangement of 24 ovals, each containing a number from 1 to 24. The numbers are arranged in a clockwise sequence starting from the top. The ovals are black-outlined and filled with white. The numbers are written in a simple, bold font. The arrangement is roughly circular, with the ovals slightly overlapping or touching each other.

FIG. 9 is a block diagram of the internal structure of the switch, showing the flow of data from the input ports through the ingress rules engine, the SA lookup engine, the DA lookup engine, and the egress rules engine, to the output ports. The diagram also shows the internal tables and registers used by the switch, including the VLAN index-to-ID table, the VLAN port-to-index table, the VLAN member set table, the port IRC control registers, the address table, and the port vector FIFO.
